

PTG Electronics

QUALITY POLICY STATEMENT

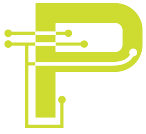

The Quality Management System of PTG Electronics applies to the contract manufacture of electronic assemblies and electromechanical products, including printed circuit board assembly (PCBA), box build integration, testing, inspection, and supply chain management

The QMS governs all processes affecting product conformity, customer satisfaction, and applicable statutory and regulatory requirements at our location(s).

Design and development activities are excluded from the scope in accordance with Clause 8.3, as PTG Electronics operates solely as a contract manufacturer to customer-provided designs. All other requirements of AS9100D and ISO 9001:2015 are applied.

PTG Electronics

QUALITY GOALS

The Continual Drive to Customer Satisfaction will be realized by:

1. 95 % On-Time Delivery
2. COQ < \$0.65/unit
3. 100% customer satisfaction: survey responses 3 (meets expectations) or better
